Other grammar checkers are inferior **than** *Correct Grammar*.

13 MISSPELLED WORDS

Correct Grammar also corrects **mispelled** words, with its own 135,000-word dictionary.

AVOID EMBARRAS WITH CORREC

Mistakes in your writing make you look bad. *Correct Grammar* helps you look good.

From simple "typos" to subtle errors in style, no other program does a better job of discovering and correcting your mistakes.

Whether you're writing a letter, memo, report, proposal, technical manual, academic paper or even fiction, *Correct Grammar* can help you present your ideas with greater clarity and precision.

Instantly, *Correct Grammar* identifies errors in grammar, style, usage, punctuation—even spelling—all at the same time. Then it politely suggests how you can correct them.

Make corrections with a click of the mouse

You can have *Correct Grammar* make the change with a click of the mouse. You can ignore the suggestion. Or rewrite the sentence your own way. It's up to you. And, unlike other programs, *Correct Grammar* automatically rechecks the changes you've just made, to make sure you haven't made any new mistakes.

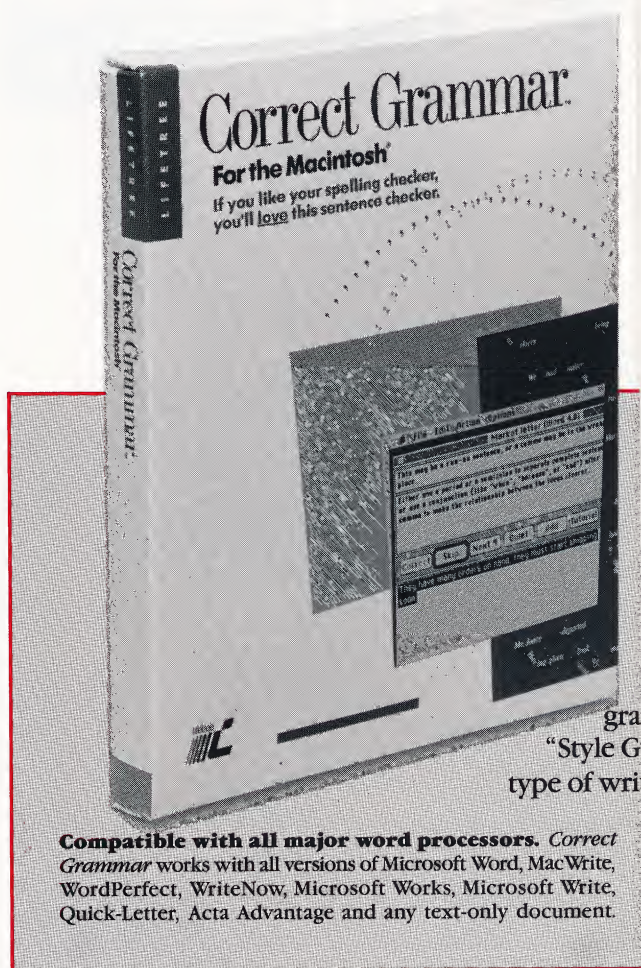

As *Correct Grammar* points out errors, you can ask it to explain the grammatical rule that applies. So you can increase your knowledge of good grammar, every time you write.

Lets you write the way you want

You can customize *Correct Grammar* to respect your personal writing style. Choose from eight style categories: Business, Academic, Informal, Technical, Legal, Advertising, Fiction or Custom.

So if you like to start sentences with

THE GRAMMAR AN THAT'S AS E AS YOUR SPELI

gra

type of wri

Compatible with all major word processors. *Correct Grammar* works with all versions of Microsoft Word, MacWrite, WordPerfect, WriteNow, Microsoft Works, Microsoft Write, Quick-Letter, Acta Advantage and any text-only document.

MISSING MISTAKES AT GRAMMAR

AND STYLE CHECKER EASY TO USE SPELLING CHECKER

conjunctions such as "Or," "And" or "But"... or if there are several informal expressions you want to use...you can do so without being asked to reconsider.

Corrects spelling too, at the same time

Correct Grammar can also check the spelling of more than 135,000 words, so there's no need to use your word processor's spelling checker.

NEW RELEASE 2.0 CHECKS STYLE, TOO

MacUser Magazine gave the original version of *Correct Grammar* a "4½ mice" rating—higher than any other grammar checker. Now, the best grammar checker is also the best style checker. New "hide" even lets you customize the program to the way you do.

System Requirements: Macintosh with 1MB of RAM and hard disk, System 4.2 or higher.

All product names are trademarks of their respective holders.

And you can customize its dictionary with as many special words as you wish. (If you use Microsoft Word, *Correct Grammar* will even recognize any words you already may have added to your Word dictionary.)

The most powerful grammar checker available

Correct Grammar contains detailed linguistic information on 135,000 words—99% of the words used in contemporary American English.

Other programs merely compare isolated words and phrases against a list of common errors. But *Correct Grammar* actually analyzes your words and phrases in the context in which you've used them to make sure the entire sentence is correct.

So it finds errors that other programs miss. And it doesn't waste your time by constantly flagging "mistakes" that are perfectly correct.

Helps you write at the right level for your audience

Other grammar checkers can only analyze the readability of an entire document at once, so you have to guess which sentences need revision.

But *Correct Grammar* compares the readability of your writing, sentence by sentence, to the education level of your intended audience. If a particular sentence is too difficult to understand, you'll know exactly which one it is—and be able to correct it on the spot.

Correct Grammar also gives you the Flesch, Flesch-Kincaid and Gunning Fog readability indexes required by the U.S. government and certain industries.
